Profile

I am Lecturer in Business and Entrepreneurship at Global Banking School, Manchester, where I teach across Levels 3 to 7, and a part-time PhD candidate in Education at Liverpool John Moores University (LJMU). From May 2024 to August 2026 I was Business Lecturer and Module Leader at Study Group (LJMU International Study Centre), leading three modules and a module teaching team, and teaching about 140 international students across Levels 3 and 4, most of whom were working in English as an additional language. My teaching and research centre on assessment, feedback and learning design after generative AI.

Higher education experience

Lecturer in Business and Entrepreneurship,
Global Banking School, Manchester — AUGUST 2026 – PRESENT

- Teach across Levels 3 to 7 to UK home mature students, including Level 4 Project Management and Business and Entrepreneurship, using structured activities, discussion and problem-solving to develop analysis and evaluation.
- Provide formative guidance and assessment support, using Microsoft Teams and supplementary digital resources within programme assessment and quality requirements.

Business Lecturer and Module Leader,
Study Group / LJMU International Study Centre, Liverpool — MAY 2024 – AUGUST 2026

- Module Leader for Marketing and Business Management (Level 4), Business Decisions and Strategy (Level 4) and International Business and Environment (Level 3), confirmed by the Centre Director for 2025/26; coordinated planning, assessment, curriculum development and student guidance.
- Led the teaching teams for two modules, Business Decisions and Strategy, and Marketing, including a team of three colleagues (two sessional, one full-time) who co-taught with me, with informal responsibility for the team, coordinating delivery, assessment and standardisation of marking across the team.
- Redesigned three 12-week modules in the VLE (108 timetabled lessons designed, with full decks for 2-hour lectures; about 192 standalone formative tasks, embedded across all lessons); wrote and redesigned schemes of work; wrote about 70 summative assessments (exams and referral exams) with full mark schemes across three intakes (an exam pack of about 30 documents per intake); wrote assessment briefs and case studies; delivered online summatives in partnership with LJMU; designed flipped classroom sessions with pre-class VLE material, including podcasts.
- Taught and assessed about 140 international students across all groups in International Business, Marketing, Strategy, Globalisation, Ethics, Trade and Business Management; supported business analysis, academic writing, assessment literacy and transition to UK higher education.
- Verified results on my redesigned assessments: class means reached 60–69% in several cohorts (highest 69%, a Marketing class), with my two Introduction to Business classes averaging 67% and 66% (February 2025), a 69-student Marketing and Business Management module averaging 66% with only two referrals (2026), and a 100% pass rate in three cohorts of 21–27 students.
- Internal examiner for Level 4 exams and case studies, marking about 110 scripts per cycle; marking confirmed by internal moderation (2026). Business Decisions January 2026 cohort (45 scripts) internally moderated for case study and exam; peer moderation of my referral exam marking changed no marks (2026). A peer moderator described my marking as “excellent, thorough, and accurate” (2026).
- Designed the Future Focus Employability assessment for the Marketing module in partnership with LJMU: a 20% summative online task combining an auto-marked quiz and a reflective action plan, with a full VLE question bank and build template.
- Rebuilt the International Business and Environment Canvas pages for Weeks 7–12 after a module review, with weekly guidance, worksheets and assessment scaffolding.
- Designed, taught and evaluated a flipped International Year One session on Hofstede’s cultural dimensions (16 predominantly EAL students): Panopto webcast, Vevox retrieval quiz, scaffolded group application, Canvas exit ticket. All respondents said the video connected closely to the class (62.5% very, 37.5% quite); I then redesigned the pre-work and task structure to strengthen preparation.

Leadership, citizenship and curriculum development

- **Teaching and Learning Champion**, Study Group, 2025/26: carried out at least four peer observations of colleagues (November 2025 – January 2026), each with a pre-observation meeting and written developmental feedback; took part in the peer-observation cycle as an observer from 2024.
- Invited member of Study Group’s national internal Quality and Board of Study committees; contributed to curriculum enhancement; wrote a module-development report for the Curriculum Committee (May 2025) and a curriculum harmonisation proposal for the business route (December 2025).

- Moderated colleagues' marking (2026); peer-mentored a colleague teaching Business Decisions, including writing weekly tutor guidance.
- Prepared an illustrative design for a 30-credit Level 7 Technology Enhanced Learning option for in-service educators, with a Canvas mock-up: 20 weeks in four units, async-first delivery, a four-part portfolio with staged formative points, AI-use guidance based on the AI Assessment Scale, and an accessibility statement (October 2026).

Previous employment

Secondary and Sixth-Form Teaching, including supply work,
Tradewind Recruitment, Liverpool and Merseyside 2020 – 2024

- Taught Business and IT, including Edexcel A-level Business: the foundation for my higher education teaching. Developed case-based tasks, differentiated resources and feedback.

Postgraduate Admissions Co-ordinator,
School of Social Sciences, University of Manchester c. 2021

Qualifications and professional recognition

PhD in Education (part-time, in progress), Liverpool John Moores University, January 2026 – present. Thesis: *Developing and Evaluating a Lecturer-Fed, Module-Specific AI Agent for Personalised 24/7 Feedback: An Action Research Study with Level 4 International Business Students.* Supervisors: Frances Tracy (lead), Peter Atherton. Programme approval ratified September 2026; clear timetabled plan to complete in 2028–29; ethical approval will be sought before fieldwork.

PGCHE (overall mark 70%+), Falmouth University, 2026

Fellow of the Higher Education Academy (FHEA), Advance HE, approved by the Fellowship Panel 12 May 2026

DMI Certified Digital Marketing Professional (CDMP), 70%+, Digital Marketing Institute, 2026

Certified Digital Marketing Associate (CDMA), Digital Marketing Institute, January 2026

DMI AI Specialist, Digital Marketing Institute

PGCE Business Studies & IT, with QTS, Liverpool Hope University, 2020

MSc Management and Project Management, Aberystwyth University, 2015

Research

Doctoral project. Insider practitioner action research on a retrieval-augmented generation (RAG) agent grounded in lecturer-curated module materials (syllabus, lecture notes, rubrics, criteria, exemplars), available 24/7 for content questions, assignment clarification, draft feedback and practice, for Level 4 international business students. The agent is bound never to complete assessed work or invent references. The study is designed as plan–act–observe–reflect cycles in my own modules, using surveys, focus groups, anonymised usage logs and a reflexive journal. A working prototype (v2, October 2026) has been built and tested on sample module materials, with 43 scripted tests passing; further testing is under way, and ethical approval will be in place before any student-facing activity.

Research interests. Generative AI and personalised feedback; assessment and learning design; inclusion and international and EAL learners; academic standards, evaluative judgement and feedback literacy; digital pedagogy; practitioner action research.

Outputs in development

- Davies, D.P. A conceptual article on assessment criteria as literacy for international Level 4 students after generative AI, in preparation for *Assessment & Evaluation in Higher Education*.
- Davies, D.P. 'Whose criteria? Assessment rubrics as a second-language literacy task and the politics of lecturer-fed AI feedback'. Abstract submitted 25 October 2026 to the *Teaching in Higher Education* special issue 'The politics of assessment' (guest eds Nieminen, McArthur and Fawns); decision due 30 November 2026.
- Davies, D.P. and a Global Banking School colleague. Emotional intelligence and trust in generative AI advice among business students (co-authored paper in development).

Funding bids

- OpenAI Researcher Access Program: US$1,000 of API credits for a study of a coaching-only AI feedback assistant on synthetic Level 4 business drafts (submitted 25 October 2026; decision pending).
- In preparation: BERA Early Career Researcher Career Development Scheme 2027: *Emotional intelligence and trust in generative AI: a pilot*, with a Global Banking School colleague (scheme closes 30 January 2027).
- In preparation: SRHE Newer Researcher Award: a short project on how international Level 4 students take up feedback when AI is used in assessment (next call expected December 2026).

Subject expertise

Business Management · Strategy · International Business · Entrepreneurship · Marketing · Globalisation · Business Ethics · Sustainability · Trade · Project Management

Digital practice and development

Canvas/VLE, Microsoft Teams, Padlet, Panopto, Vevox, digital quizzes, Microsoft 365; AI-supported learning-resource development; design and build of a RAG-based module agent. LJMU Faculty Research Degree induction and Research Ethics online training completed.
